

How to run Office Space game (AKA my Game 230 final)

1. Says yes to opening the computer
2. Reply with outlook to read the instructions
3. Exit the computer then type 'go left' to leave the cubicle
4. Go up to the break room and drink the coffee (this is not technically required to beat the game but without the coffee you'll miss out on a lot of dialogue and the best ending for the game)
5. (NOT REQUIRED) go right to the bathroom to find a clue engraved on the paper towel dispenser
6. Go back to the main office space (go left, then go down) and look at cubicle 2
7. Pick up the letter opener (again not required but you see more in the ending if you do)
8. Go down to the server room
9. Turn off the power
10. Go up then right to the locker room (the electronic locks will now be unlocked)
11. Check locker 3 for the code to the Quinton's office
12. Go left then left again
13. Input the code
14. Play out the ending (for the 'best' ending don't use the knife)

Fun things I want you to know about the code:

- If you look at John's cubicle and decide to put on his shirt you'll automatically put on his jacket if you check his locker
- You can pick up the house plant during the opening segment
- If the lights are off when entering the code to the office your character will struggle inputting them, if the lights are on this message won't appear.

I spent way too long on the story and script of this game. I apologize for the mildly traumatising content.
